A Presentation Book is a great way to gather all the research into a gift for a member of your family. All the trees and reports described on our web site can be included in a presentation book. The Table of Contents and Index shown above will also be included for ease of reference. The book is sent in a loose-leaf binder (it is a living, growing document) with a specially designed cover that may include as many as four photographs of your choosing. Presentation Books are an additional \$15 plus \$1 per printed page. Final cost can be discussed via phone or e-mail before printing is completed as it is nearly impossible to estimate the pages until the research is completed and the book is fully formatted.
